

Problem 4 – Intense

Create a Web page (HTML5 + CSS3 + images) that looks and behaves like the screenshots below:

What You Will Learn

Web design basics

Making and editing shapes

Shapes have an endless variety of characteristics, each communicating different messages to your audience. At our event you will learn how to create and edit your own shapes.

Advanced masterclasses

Working with 3D graphics

3D graphics introduce a new advantage in modern web design as well as in any design in particular. Intense Event offers its visitors a variety of 3D graphics masterclasses to try their skills in this sphere.

Drawing workshops

Drawing your first design

Intense event offers you a perfect opportunity to study basics of web design and create your first project by drawing a composition in modern design programs or improve it.

Our Speakers
